We have determined that this is appropriate because we use data in a way that the data subject would reasonably expect, and we believe there is a minimal privacy impact. Our legitimate basis is the pursuit of our services as detailed above.

- The storage and processing of personally identifiable information is necessary for this purpose - to this end we will store and process only the information required maintain communications between the Blue Shield.

- We do not conflict with the Data Subjects interest in this manner and base this assumption on the fact that they will have a reasonable expectation that we will need to store and process their data order to perform this service.

4.2 Benefit: In terms of benefit, we benefit from being able to pursue our legitimate interests in maintaining communications between the Blue Shield network.
4.3 Blue Shield national committees benefit through our support, and in maintaining this communication. There are no wider public benefits.

4.4 Impact: If we were unable to operate in the above way, our network would suffer significantly.

4.5 Use of data: We will not use the data in any unethical or unlawful way.

4.6 Necessity: The processing furthers the interests of the Blue Shield Board, and the interests of Blue Shield committees. The processing of data and the matching of candidates to receive the newsletter (i.e. those response for national committee communications) and to join the forum is reasonable and fair. There is no way that we can best serve national committee interests by collecting less data or operating in a less intrusive way.

4.7 Possible impacts: As far as the storage and processing of personal information is concerned, we do not believe there is any possible impact on the Data Subject because of the storage.
